

FACILITY MANAGEMENT CONSULTANCY

■ PSM Co. Facility Management Consultants partner with the client to deliver end-to-end fullservice solutions that meet all the client's needs from the early stages of planning to construct a

building till to the last stages of managing the building's businesses in terms of Facility and Property Management.

■ Our engineers will help the client to achieve the highest performance possible from the facilities to ensure occupant comfort, improve systems efficiency, reduce operational costs and optimize planning strategies for the life of the assets. Through our digital solutions, we offer around the clock execution and active measurement and management of your operations. Our Facility management consulting includes planning and building support. The consultation begins with the definition of goals, strategies, analysis, surveys and requirements, runs alongside the contracting phase and, at this early stage, provides for quality assurance during planning and building. The last stage is to provide both Facility Management and Property Management services and tailored consultancy to meet specific needs.
